

Choose from one of our three measuring techniques to get your ring size.

For accuracy, please print your PDF at 100%  
This line should measure 1 inch 

## The Surprise Test

**FIND:** Find a ring that your sweetheart currently wears on the same finger as the new ring.

**MEASURE:** Place the ring on top of each circle. Find one that shows the entire black line circle on the INSIDE of the ring with no extra space showing.

**CHECK:** Double check for accuracy.

## The Paper Test

**CUT:** Carefully cut out the paper ring sizer below and create a slit on the line labeled "your size"

**MEASURE:** Slip the pointed end through the slit and place around your finger, pulling the pointed end until it fits snug. The number line located at the "your size" slit is your size.

**CHECK:** Double check for accuracy.

## The String Test

**CUT:** A small piece of string, thread, ribbon with a similar width to your desired ring.

**MEASURE:** Wrap it around your finger for a snug (but not tight) fit. Compare it with our "surprise test" chart to determine your size. For best results, have someone help you measure.

**CHECK:** Double check for accuracy.

### **RING SIZING GUIDE:**

While this guide may be close enough to get your design process started, it may not be 100% accurate. You will want to verify your size with a reliable ring sizer before approving your design for production. And don't worry! We want your ring to fit perfectly so we always resize for FREE up to 30 days after delivery!
